The L Shape sofa set ensures a very rich & elegant look for your drawing room. A drawing room is the place that is mostly visible to all the visitors at your house. And it's the first impression of your life style. We have chosen two of the most gorgeous designs to enhance the look of your drawing room. The tufted velvet on our sofa is so smooth that it can mesmerize you on just one touch. Yet you do not slip on it as the texture of velvet holds you. The golden legs depicts the premium royal segment, this sofa belongs to.

Center Table

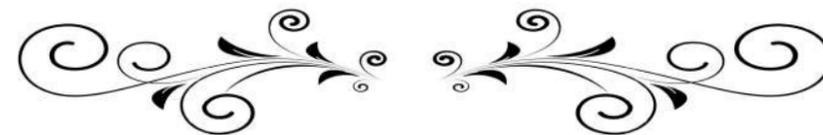

Ever wondered why that box in the midst of the drawing room is called center table..? Well the main reason is that it is the center of anything that is related to your lifestyle in the house. If some guest comes over to meet you, you serve tasty meals and a “masala chay” on that table. If you are tired a bit, you stretch your legs on that center table. To have your TV remote in your vicinity, center table is the most appropriate option nearby to keep it safely. Center table is that thaal where you keep that “shagu ka sava rupiya” on some beautiful family occasion.
