HOW WE MAKE IT?

ABOUT GUARDIAN

We are monks and merchants widely known as Guardians. We are exporters, civil contractors, furniture manufacturers and builders. Since 2012 we are situated in Gandhidham (Gujarat state), India, engaged into various streams of businesses. Gandhidham is geographically situated at the most reputed port which has been India's number 1 major port and is highly suitable location for any type of International business. Gandhidham is just only 50 kilometers away from Mundra Port (Adani Port) and 18 kilometers away from Tuna Port. Being a classic location for shipping, warehousing and transportation, Gandhidham is the appropriate location for any kind of sourcing, storage and shipping business.

TYPES OF SALT EXPORTED BY GUARDIAN

TYPES OF SALT WE EXPORT ALONG WITH INDUSTRIAL SALT

TABLE SALT

This is the most commonly used salt for cooking, baking, and last-minute seasoning. It has a fine texture and uniform crystal size, which is great for measuring volume. Uses: Table use, cooking, baking, and last-minute seasoning.

IODIZED SALT

Iodized salt is just table salt with iodine added. As iodine deficiency becomes more common, so does the need to fortify table salt with potassium iodide. Most iodized salt products also include an anti-caking agent to prevent the table salt from clumping. The iodine and anti-caking agent can result in a more metallic-tasting salt. Uses: Table use, cooking, baking, and last-minute seasoning.

FLAKE SALT

Flake salt is a sea salt variety defined by its ultra-flaky, pyramid-like crystals. These flakes stick to food better, dissolve more quickly, and impart flavour without changing the texture. It's often used as a finishing salt. Uses: Finishing for meats, seafood, baked goods, and creating spice blends.

INDUSTRIAL SALT USAGES AND APPLICATIONS

SALT FOR DE-ICING

De-icing is one of the most frequently used applications for salt. Roads, sidewalks, and other surfaces can become dangerous if an icy layer is formed. To prevent or postpone ice formation, de-icing road salt is applied to the roadways to form a brine layer before the surface is frozen.

SALT IN THE OIL INDUSTRY

In the Oil Industry Salt is added to mud as drilling fluid, which helps as lubricant and coolant for the drill head. Also, salt makes oil drilling more safe and more efficient by increasing soil density. Salt can also serve as diverting agents, flocculants, additives, acidizing specialty dispersants, and stabilizers in the oil industry.

SALT IN THE ENERGY INDUSTRY

The energy industry serves as another example of the uses for salt. Industrial salt is needed for producing energy, such as solar power. This aids in maintaining a specific salinity level needed for certain reactions.

INDUSTRIAL SALT USAGES AND APPLICATIONS

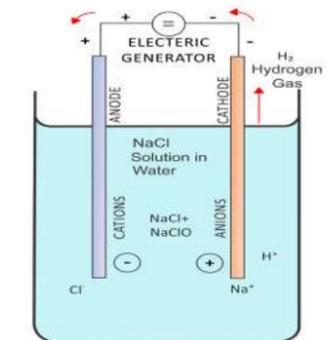

SALT IN THE CHEMICAL INDUSTRY

Industrial salt is also commonly used in the chemical industry to produce various chemicals. It can be used as a raw material when making chemicals like caustic soda, chlorine, and soda ash. Additionally, liquid sodium, sodium nitrate, metallic sodium, sodium bicarbonate, sodium sulphate, and other products can be produced

SALT FOR ELECTROLYSIS

As previously discussed, industrial salt is used to produce chlorine. You should know chlorine is a key ingredient in many hygiene and cleaning products. Sodium chloride is used as raw material for chlorine synthesis, which starts with the electrolysis of a saturated salt solution.

SALT IN THE METAL INDUSTRY

In the metal industry, companies commonly use salt in secondary aluminum production and in processing several metals to remove impurities.

INDUSTRIAL SALT USAGES AND APPLICATIONS

SALT FOR WATER TREATMENT

Water treatment is the procedure that eliminates impurities and unwanted elements from the industrial water supply, as well as makes it safer for people to drink and use for irrigation purposes. To remove hardness in water, water-softening salt is used to remove minerals like calcium and magnesium. Dishwasher salt and regeneration

SALT IN THE TEXTILE INDUSTRY

Textile industries use salt very frequently to fix the batches of dye. By using salt, the textile industry attains standardized dye.

SALT IN THE PHARMA INDUSTRY

Salt is widely used in pharma to prepare saline solutions and capsule production. Salt is used in the pharma industry to produce products like contact solutions, intravenous formulas, and many more.

INDUSTRIAL SALT USAGES AND APPLICATIONS

SALT IN THE SOAP

Industry Industrial salt is frequently used as an additive filler in solvents and detergents. Sodium chloride is also frequently found in soap. Salt is used as a filler to help the chemicals separate quickly. Salt in the Pigment Industry salt are two examples of salt used for water purification for commercial and residential purposes. using industrial salt.

SALT IN THE FOOD INDUSTRY

In the food industry, salt is used to cure and preserve meat. Curing has been a simple and effective way of preserving food for thousands of years. When the salt is applied to the meat, the moisture is removed to prevent the growth of the bacteria and make it stay for a long time.

CONCLUSION

As you can observe, salt's applications in the industry range from food processing to chemical production and water treatment. Canada Salt Group Ltd is a reliable salt supplier in Canada and has a wide range of salt products with multiple delivery and pickup options. If you are a business looking for high-quality salt products, contact us for a free estimate.

TYPES OF RICE EXPORTED BY GUARDIAN

ONE STOP SOLUTION FOR

SOURCING

CONSOLIDATION

EXPORT

WE HELP TO MANAGE YOUR SUPPLIERS

Supplier relationship management is the most important part of the supply chain and only working with the right supplier will help you to get the right product, under the right price, and by the right delivery. You may spend lots of time and money on unqualified suppliers and may find your ideal supplier after spending a long time on research. With Monks & Merchants, we will help you to manage your suppliers on your behalf and you will not have these kinds of issues anymore. Monks & Merchants will be the only supplier you need to support your business growth.

SUPPLIER RESEARCH

There are more than a million suppliers on IndiaMart and Alibaba but there are millions of factories you totally cannot find online in India which have cheaper prices. Also, there are some cities specialized in certain product categories for e.g. Kutch for Handicrafts and fabrics, Kanpur for leather, Bangalore for computer hardware and software, Morbi for tiles manufacturing. Monks & Merchants will do full supplier research and provide supplier relationship management according to your sourcing requests. Our vast supplier network and on-ground sourcing experience help to find the best-matched supplier for you.

AUDIT & COMPLIANCE

When you are working with a new supplier, you don't know if they are a real manufacturer or not, will they fulfill their commitments or not, or if can they be trusted. You may spend lots of time experimenting with different suppliers. Monks & Merchants will help you to audit suppliers from the start to avoid these kinds of issues.

DYNAMIC MANAGEMENT

We monitor the supplier's performance continuously with each order and delivery. We filter and remove bad suppliers from our network replacing them with new high-quality suppliers to make sure that we deliver high standards and high performance to our partners.

SUPPLIER DEVELOPMENT

Monks & Merchants supply chain includes core manufacturers from most of the industries. We keep on developing our relationships with these manufacturers to make sure we get the most competitive price and they are more willing to cooperate with Monks & Merchants, by providing small MOQs, favorable pricing, quality samples, priority production and faster delivery to help our partners to be more competitive.

MULTI-SUPPLIER PAYMENT HANDLING

We can help you to make multiple payments to different suppliers on your behalf so that you do not have to worry about it. You can provide us the complete payment by a single transfer which is convenient and low cost.

OUR QUALITY CONTROL & INSPECTION PROCESS

FACTORY AUDIT

To help our clients minimize risk, we audit any factory for its legality, scale, trade capacity and production capacity from the very beginning. This ensures they possess the ability to complete your order to the standards we demand.

FIRST ARTICLE INSPECTION

In order to verify that your product is manufactured to your specifications, we inspect the very first article produced. If any issue is detected, we are in a position to quickly correct or change to avoid further issues in this area.

DURING PRODUCTION CHECK

This is performed once the production is in full swing. Once 20-60% is complete, we will randomly select units from these batches for inspection. This ensures the quality levels throughout the production cycle, and keeps the factory on track.

OUR QUALITY CONTROL & INSPECTION PROCESS

PRE-SHIPMENT INSPECTION

This inspection is usually performed when the production is around 90% complete, and represents the last chance to undertake corrective action if required. It's also regarded as an effective step in safeguarding your products from costly import issues that may have arisen.

CONTAINER LOADING CHECK

The Container Loading Check is essential to make sure that goods received from suppliers are in accordance with the order requirements such as quality, quantity, packaging, etc. after checking the workers will start loading the goods safely into containers.

LABORATORY TESTING

Our Laboratory Testing services are there to ensure that compliance is met with every product manufactured. The service covers performance, safety, quality and any other established standards in order to qualify for any certification your target market requires.

OUR GENERAL SERVICES

MULTIPLE SUPPLIERS PRODUCT CONSOLIDATION

We can consolidate the goods from multiple suppliers in our warehouse from all around India. Inspect goods when they reach our warehouse and place them in one container to save your costs effectively.

FLEXIBLE WAREHOUSING SOLUTIONS

Our warehousing and consolidation in India service is available to you. Our warehousing services are located strategically in Gandhidham (Kandla port), Mundra (Mundra Adani Port), Surat (Hajira port) and Mumbai (Navasheva Port) so that we can collect your goods from all around India, save your cost and time.

PAYMENT CONSOLIDATION

Helping you to make payments to different suppliers and receive the goods, and you can pay to us.

PICKUP AND DELIVERY

We provide pickup and delivery services to/from multiple suppliers to our warehouse for your diverse needs.

QUALITY CONTROL

Our expert team will inspect your goods according to your requirement when we pick up from multiple suppliers.

OUR GENERAL SERVICES

PALLETIZING

Combining your goods by adding pallets to them before shipping, ensuring seamless delivery and secure handling.

INVENTORY MANAGEMENT & REPORT

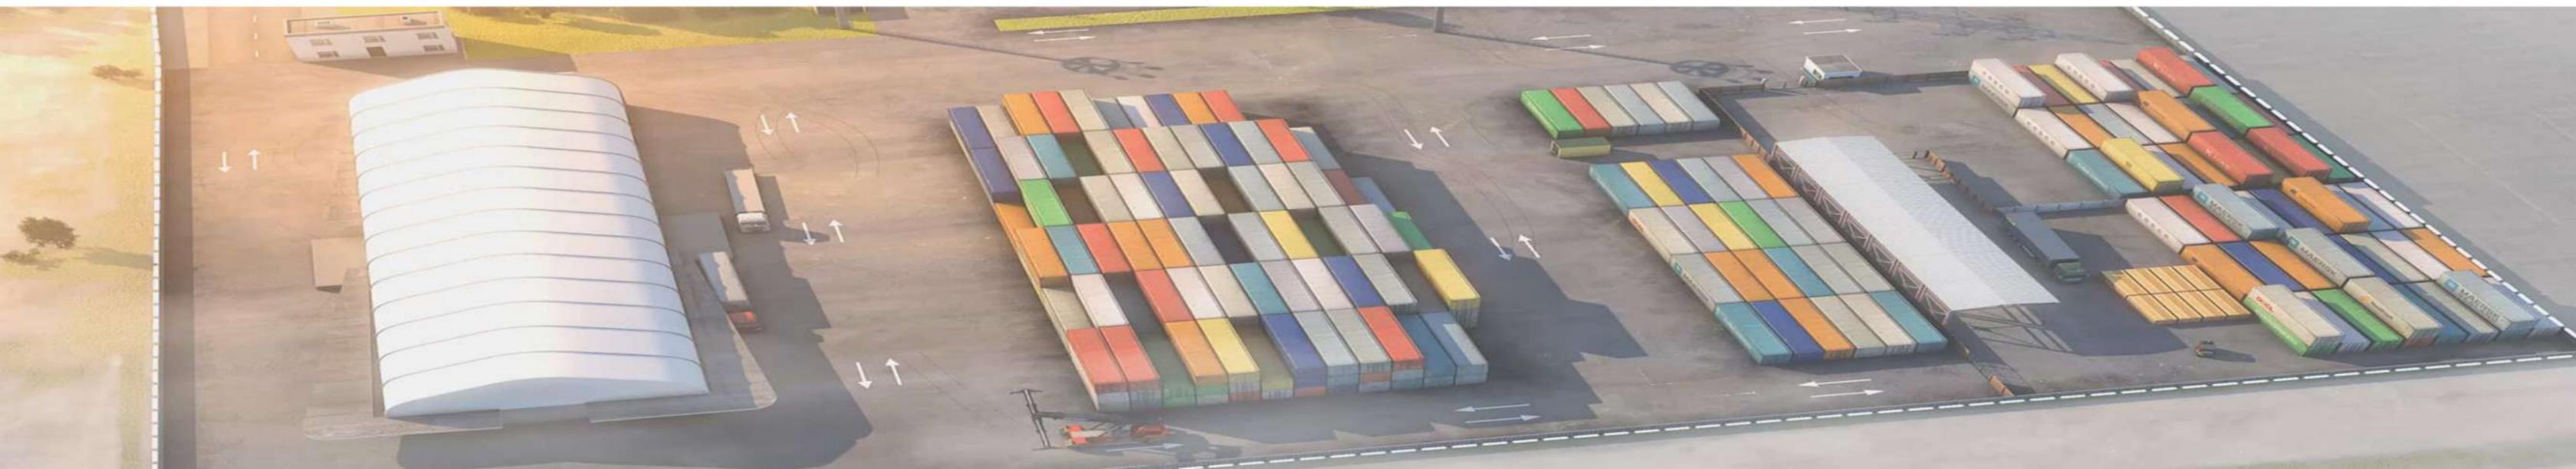

We will provide you regular reports on your inventory in our warehouse, so you can track them easily.

HIGH VALUE GOODS STORAGE

We have a dedicated space for high value items in our warehouse with 24/7 monitoring by our expert security team.

DANGEROUS GOODS STORAGE

We provide special handling services for dangerous goods by following international safety guidelines and regulations.

OUR SHIPPING & LOGISTICS SERVICES

AIR FREIGHT

Need high-quality shipping solutions on a smaller scale? We are here to help! We work with the best Airline shipping companies all over the world, providing delivery services on a smaller scale, but with no loss of speed!

SEA FREIGHT
